1998 thru 2000 Dodge Durango and Dakota With Air Conditioning

1. After removing the original heater from the heater case, small plastic tabs may be noticeable at the bottom of the heater case where the heater was located (see Figure 1).
2. Use snips or cutting tool (see Figure 2) to remove the tabs as close to the heater case bottom as possible.
3. Add foam (included) to the perimeter of the heater core before installing (see Figure 4).
